AXE CAPITAL × TECHCRAST CONNECTEDSUITE · TC-FPA-2026-02

Founding Partnership and Co-Development Agreement

Axe Capital and Techcrast agree to build the ConnectedSuite estate together. Axe runs its book and its collections floor on the estate today; under this agreement it also becomes a founding member of the Interchange, holds a fixed partner rate, and helps decide what the estate builds next.

Prepared for	Provider	Reference	Start date

AXE'S MONTHLY SUBSCRIPTION	VALUE AT LIST PRICE	FOUNDING PARTNER RATE
KES 30,000	**KES 45,000**	**−15,000**
Fixed for 24 months. Covers the Lending Console, CallBox on ConnectBox and the Interchange.	Console Premium 30,000 + CallBox 15,000; Interchange membership waived as a contributor.	Shown on every invoice, so Axe's board can see what the partnership is worth.

AXE RECEIVES	AXE CONTRIBUTES
• The Lending Console (Premium) on Axe's own ServiceSuite books: Boresha (entity 3003) and Stawi (3004). • CallBox Call-Center running Axe's ConnectBox floor. • The Interchange on the same terms as Micromart: exposure checks, ecosystem reports and bureau reports. • Analytics, Ledgerly, PeopleHub and the Customer Portal during co-development, at no added fee (clause 4). • Axe's own branded door and installable app, "Axe Capital", on staff desktops and phones. • A permanent Product Council seat, early access, and a referral share.	• KES 30,000 a month. • Its book, contributed to the Interchange in tokenised form, as Boresha and Stawi already are. • Its lending and collections expertise: requirements, workflow reviews, pilots and acceptance testing. • Real-world testing on its floor and in its branches, with feedback within 5 business days. • Reference use as a Founding Partner, in wording Axe approves.

01 Parties and background

Techcrast Software Solutions Limited ("**Techcrast**"); and **Axe Micro Enterprise Limited**, trading as **Axe Capital** ("**Axe**"), represented by its Chief Executive, **Benedict Omondi**.

A. Axe licenses Techcrast's ServiceSuite loan management system, which holds its book on entities 3003 (Boresha) and 3004 (Stawi). Since October 2026 Axe's officers have worked that book through the ConnectedSuite Lending Console, and its collections floor, ConnectBox, through CallBox.

B. Axe was admitted to the Interchange as an active member on 17 September 2026, with member codes AXE-3003 and AXE-3004, on approval by the Interchange's ecosystem governor.

C. Axe's Chief Executive has proposed that Axe and Techcrast build the whole estate together. This agreement sets out how, and on what terms.

02 Terms

1. **Standard terms incorporated.** Clauses 1 to 14 and Schedules 3 to 5 of the ConnectedSuite Ecosystem Partner Agreement, form TC-EPA v1.0 (the "**Standard Terms**"), apply as if written out here, with "Partner" meaning Axe. Where this document and the Standard Terms differ, this document prevails.
2. **Systems.** From the Start Date (1 October 2026), Axe holds:

(a) the **Lending Console — Premium**, in bridged mode on Axe's ServiceSuite (entities 3003 and 3004), with Boresha and Stawi kept separate throughout;

(b) **CallBox Call-Center**, operating Axe's ConnectBox floor, with up to 10 agent seats under this agreement and further seats by agreement; and

(c) **The Interchange**, as a contributing member.

3. **Fees.**

3.1 Axe pays a **Founding Partner rate of KES 30,000 per month** for the systems in clause 2. The rate is fixed for the Initial Term of 24 months from the Start Date. Each invoice lists the systems at list price, the Interchange membership as waived, and one "Founding Partner rate" adjustment, totalling KES 30,000.

3.2 Usage within the Premium allowances is included. Usage beyond them is charged under the Price Book. Bureau and identity checks are charged at pass-through cost plus the stated margin.

3.3 October 2026 is billed on Techcrast invoice **INV000088** (KES 30,000). From November 2026, invoices are issued by ConnectedSuite as INV-AXE-YYYYMM, downloadable in Axe's console under Billing. They are payable through the BirgenAI wallet from the console, or to M-PESA Buy Goods till 5620596.

3.4 After the Initial Term, the rate may rise by no more than 10% in any 12 months, on 60 days' notice.

4. **Co-development.**

4.1 **Joint roadmap.** The Parties keep a written roadmap, reviewed at each Product Council meeting (at least quarterly, and monthly during the first six months). Axe may propose items; Techcrast decides priority and design, and records why an Axe proposal is accepted, deferred or declined.

4.2 **Pilots.** While a system is in co-development, Axe may use it at no added fee: Analytics & Reporting, Ledgerly Accounting, PeopleHub HR and the Customer Portal from the Start Date. Once a system is declared generally available for Axe, it is either added to clause 2 at the Founding Partner rate agreed at that time, or switched off, at Axe's choice. Axe gives notice of its choice within 30 days.

4.3 **Axe's part.** Axe nominates a product lead, makes its subject-matter experts reasonably available, reviews requirements and builds, runs agreed pilots, and responds within 5 business days.

4.4 **Techcrast's part.** Techcrast assigns engineering capacity to the joint roadmap, demonstrates each release to Axe before it reaches Axe's users, and does not put anything on Axe's live books (including any write to Axe's ServiceSuite or ConnectBox) without Axe's written go-ahead for that capability.

4.5 **Ownership of what is built.** Everything built under this clause is part of the Platform and is owned by Techcrast or its designated affiliate, under clause 8 of the Standard Terms. Axe's own configuration (its products, workflows, charges, branding and reports) remains Axe's to use and to export.

5. **The Interchange — on the same footing as Micromart.**

5.1 Axe contributes the positions of Boresha and Stawi under Schedule 3 of the Standard Terms, signed with Axe's own member keys.

5.2 Axe receives the same access as every other founding member: exposure checks, the consent register, the member directory, and ecosystem reports free while its contribution is current.

5.3 Bureau reports requested by Axe are fulfilled under the Interchange's bureau contract, reimbursed to the contract holder at cost and billed to Axe at cost plus the stated margin. That is conditional on the bureau's (Metropol's) written approval of the arrangement being in force. Until it is, or if it lapses, Techcrast will connect Axe's own Metropol subscription through the Interchange at no added fee.

5.4 Axe's book is never visible to any other member, including Micromart. Other members see only the aggregates described in Schedule 3, and the reverse is equally true.

6. **Recognition and reward.**
6.1 Axe is named a **Founding Partner** of Techcrast ConnectedSuite, in wording Axe approves.

6.2 **Referral share.** 10% of the first 12 months' subscription Fees paid by each lender Axe introduces, as in clause 9 of the Standard Terms.

6.3 **Most-favoured partner.** During the Initial Term, no other lender taking the same systems on comparable volumes receives a lower monthly rate without the same rate being offered to Axe.

6.4 **No equity.** No shares, options or ownership interest are conferred by this agreement, under clause 8.4 of the Standard Terms. If the Parties later agree a performance-based instrument, it will be a separate document approved by the issuing company's board.

7. **Data and the live books.** Axe is the controller of its data, and Techcrast its processor. Techcrast reads Axe's ServiceSuite and ConnectBox databases only over the connections Axe has authorised. Writes are enabled capability by capability, only on Axe's written instruction, and each is recorded in an audit log Axe can read. Axe may revoke any write capability at any time by written notice, effective within one business day.

8. **Term.** The Initial Term is 24 months from 1 October 2026, renewing for 12-month periods under clause 11 of the Standard Terms.
