CONNECTEDSUITE

PRICING · EFFECTIVE 1 NOVEMBER 2026

ConnectedSuite Price Book and Subscription Guide

Seven systems for licensed lenders, priced one by one. You choose the systems you need, and the combination sets your monthly subscription. This guide shows every price, every discount, and worked examples of real packages.

Prepared for	Issued by	Version	Currency
Lenders and prospective clients	**Techcrast Software Solutions Ltd**	**1.0 · 20 Oct 2026**	**Kenya shillings (KES)**

For circulation to lenders. Prices exclude VAT where VAT applies. Prices on a signed order form or partner agreement take precedence over this guide.

01 How the subscription works

Techcrast ConnectedSuite is one estate of systems that share one sign-in, one organisation structure and one record of every borrower. Each system is a product you can take on its own or together with others. Your monthly bill is built in four steps, and every invoice shows all four:

STEP 1
Choose your systems. Each carries a monthly list price.

STEP 2
Multi-system discount. 10% for two, 15% for three, 20% for four or more.

STEP 3
Partner rate, if signed. A partner agreement fixes the monthly figure.

STEP 4
Usage past your allowance. Metered at the unit prices in section 4.

You are billed monthly. Each invoice closes the calendar month (Nairobi time), is issued on the first day of the next month, and is due on receipt. Invoices are downloadable as PDFs at any time from **Billing → Subscription & Invoices** in your console.

02 The systems and their prices

SYSTEM	WHAT IT DOES	KES / MONTH
Lending Console — Premium	Origination, scoring, approvals, disbursement, repayments and collections: the loan book, every day. Unlimited staff seats, portfolio early-warning and your own risk policy.	30,000
Lending Console — Startup edition	The same console for a young lender (eligibility in section 3). Up to 40 seats; includes CRB and ID checks, the statement cruncher, Riri and the route planner.	20,000
CallBox Call-Center	The collections floor: dialler, work queues, promises to pay, call records and recoveries. Runs on your PBX or on ConnectBox. Up to 10 agent seats; larger floors are quoted.	15,000
Customer Portal	Your borrowers apply, track and repay on their phones, in your brand. Installable app.	10,000
Analytics & Reporting	Portfolio, branch, agent and collections reporting on the live book, plus scheduled reports.	7,500
Ledgerly Accounting	Your journal, chart of accounts and cash movement, read straight from the book.	7,500
PeopleHub HR	The staff directory: officers, branches and the call floor, joined into one record per person.	5,000
The Interchange	Peer exposure checks across member lenders, a consent register, CRB orchestration and bureau reports.	10,000
Interchange membership for an Ecosystem Partner that **contributes its book** to the exchange		Waived

Every system includes

Hosting in Nairobi, daily backups, security updates, your own branded sign-in door and installable app, the BirgenAI ID single sign-on across every system you hold, Riri support inside the console, and standard support (section 6). There is no charge per borrower and no charge per loan.

03 Editions, discounts and partner rates

The Startup edition

The Startup edition exists so that a newly licensed lender can run on professional infrastructure from day one. It is the Lending Console at **KES 20,000 a month** instead of 30,000. A lender qualifies when all three of these hold:

- it is licensed or registered to lend in Kenya (CBK digital credit provider, microfinance, SACCO or an equivalent), or has applied;
- it has been lending for less than 24 months, or holds fewer than 2,000 active loans; and
- it takes the Lending Console as its main system. Other systems can be added at list price, and the multi-system discount still applies.

A Startup lender moves to Premium at its first renewal after it passes either threshold. We give 60 days' written notice, and nothing is migrated: the change is a setting.

The multi-system discount

SYSTEMS CARRYING A PRICE	DISCOUNT ON THE LIST TOTAL
One	None
Two	10%
Three	15%
Four or more	20%

Partner rates

Lenders who sign an Ecosystem Partner Agreement (a separate document) build the estate with us: they contribute their book to the Interchange, give product feedback, and take part in pilots. In return their monthly figure is fixed by the agreement and locked for its term. The invoice still lists each system at list price, so the partner can see the value of the rate, followed by one *partner rate* line that brings the total to the agreed figure.

04 Allowances and usage

Each Lending Console edition includes a monthly allowance of metered services. You pay only for use beyond it, at the unit prices below. Unused allowance does not carry over.

METERED SERVICE	STARTUP INCLUDES	PREMIUM INCLUDES	BEYOND ALLOWANCE, KES
Credit scores	3,000	10,000	10 each

M-PESA statements crunched	1,500	5,000	5 each
Documents parsed	800	3,000	5 each
CRB reports (bureau pass-through)	300	1,000	35 each
Identity verifications (pass-through)	400	1,500	40 each
Riri questions	2,000	10,000	3 each
SMS	2,000	5,000	Prepaid, below

SMS bundles (prepaid)

Past the monthly SMS allowance, messages draw on prepaid credit, so they never appear on an invoice in arrears. Credits never expire. Signing codes and consent links always go out, even on a zero balance; reminders pause until a top-up lands.

BUNDLE	PRICE, KES	PER SMS
500 SMS	500	1.00
2,000 SMS	1,900	0.95
10,000 SMS	9,000	0.90

A lender sending through its own SMS provider, configured in the console vault, pays nothing here for messages.

Interchange reports

- **Ecosystem reports** (exposure, delinquency, intent and cohort, computed from members' own books) are free to contributing members. A member that stops publishing its book loses the free tier.
- **Bureau reports** are charged at the bureau's net price for the report set, plus 10% excise and 16% VAT, plus a stated platform margin. The margin is printed on the invoice line, never blended into the price. Bureau prices today range from KES 25 to KES 200 net per report.

05 Worked examples

Every figure below is produced by the same code that issues the invoices.

A startup lender, console only

Lending Console — Startup edition	20,000
Monthly subscription	**KES 20,000**

An established lender, console only

Lending Console — Premium	30,000
Monthly subscription	**KES 30,000**

Console and call-centre

Lending Console — Premium	30,000
CallBox Call-Center	15,000
Multi-system discount, 10%	−4,500
Monthly subscription	**KES 40,500**

A call-centre on its own

CallBox Call-Center	15,000
Monthly subscription	**KES 15,000**

The whole estate

Lending Console — Premium	30,000
CallBox Call-Center	15,000
Customer Portal	10,000
Analytics & Reporting	7,500
Ledgerly Accounting	7,500
PeopleHub HR	5,000
The Interchange	10,000
Multi-system discount, 20%	−17,000
Monthly subscription	**KES 68,000**

For an Ecosystem Partner that contributes its book, Interchange membership is waived. The list total is then 75,000, and the price book gives KES 60,000. That is the usual starting point for the figure fixed in a partner agreement.

06 Onboarding, support and service levels

ITEM	STANDARD	STARTUP	PARTNER
Onboarding: set-up, data migration, training (one-time)	KES 50,000	KES 25,000	Waived
Connecting an existing ServiceSuite book (bridged mode)	Included in onboarding		
Support hours	Monday–Saturday, 08:00–18:00 EAT, through Riri in the console, email and phone		
Severity 1 (system down) response	2 hours	4 hours	1 hour
Monthly availability target	99.5%, measured at the sign-in door		
Your own branded app and door	Included		

07 Paying

Every payment to Techcrast ConnectedSuite settles through the **BirgenAI wallet**. There are two ways to pay:

From your console

Open **Billing → Subscription & Invoices** and press **Pay** next to the invoice. The M-PESA prompt comes to the phone you enter. The invoice is marked paid as soon as M-PESA confirms.

M-PESA Buy Goods

Pay the invoice total to **Till 5620596**. Then press **I paid the till** next to the invoice and enter the M-PESA code. The invoice shows as paid once the till statement confirms it.

An invoice unpaid 14 days after issue moves the subscription to *past due*. Metered services (scoring, CRB, identity, Riri) pause until payment; **the loan book, repayments and collections never stop.** Nothing is deleted for non-payment.

08 Terms in brief

- **Term.** Month to month, unless a partner agreement or order form sets a term. Either side may end it with 30 days' written notice.
- **Price changes.** On 60 days' written notice, never during a fixed term. Past invoices never change: each is frozen with the prices as charged.
- **Your data.** Your book and your borrowers' data remain yours. Techcrast processes them on your instructions, under the Kenya Data Protection Act 2019. On exit you receive a full export.
- **Adding or removing a system.** Takes effect from the next billing month.
