Techcrast
CONNECTEDSUITE

OFFER AND SUBSCRIPTION TERMS · LENDING CONSOLE, STARTUP EDITION

Startup Lender Programme

A newly licensed lender should not have to choose between professional infrastructure and its runway. The Startup edition is the full Lending Console for KES 20,000 a month, live in days, with room to add the rest of the estate as the book grows.

For	Provider	Form	Price
New and small licensed lenders	**Techcrast Software Solutions Ltd**	**TC-SLP v1.0 · 20 Oct 2026**	**KES 20,000 / month**

Offer document with order form. Signing the order form forms a subscription on these terms and the ConnectedSuite Price Book v1.0.

01 The offer

MONTHLY	ONBOARDING	COMMITMENT
KES 20,000	**KES 25,000**	**Monthly**
Instead of 30,000 for Premium. No per-loan or per-borrower charges.	One-time, half the standard fee: set-up, product and workflow configuration, training.	Month to month, 30 days' notice. Move to Premium when you outgrow it.

What the Startup edition includes

- **The loan book end to end:** borrowers, KYC verification, products, charges, workflows and approvals, disbursement and float, repayments and reconciliation, collections and promises to pay.
- **Credit decisions:** real-time credit scoring, the M-PESA statement cruncher, the document parser, CRB orchestration and identity verification, within monthly allowances.
- **Riri**, the console's assistant, for analysis and help, and the field officer **route planner**.
- Up to **40 staff seats**, your own branded sign-in door and installable app, SMS reminders and campaigns, and the standard dashboards (Overview, Collections, Finance, Risk).
- Hosting in Nairobi, daily backups, security updates and support Monday–Saturday.

INCLUDED EVERY MONTH	UNITS	BEYOND, KES EACH
Credit scores	3,000	10
Statements crunched	1,500	5
Documents parsed	800	5
CRB reports	300	35
Identity verifications	400	40
Riri questions	2,000	3
SMS	2,000	prepaid bundles

02 Who qualifies

A lender qualifies for the Startup edition when all three hold:

1. It is licensed or registered to lend in Kenya (a CBK digital credit provider, a microfinance institution, a SACCO or equivalent), or has applied for that licence and shows us the application.
2. It has been lending for less than 24 months, **or** it holds fewer than 2,000 active loans.
3. The Lending Console is its main system.

When a lender passes both the 24-month mark and 2,000 active loans, it moves to the Premium edition (KES 30,000) at its next billing month after 60 days' written notice. Nothing is migrated or re-installed: the edition is a setting, and the book stays where it is.

03 Growing into the estate

A Startup lender can add any other system at its list price, and the multi-system discount applies from the second system. For example:

PACKAGE	LIST	DISCOUNT	MONTHLY
Console (Startup) alone	20,000	—	**20,000**
Console (Startup) + CallBox	35,000	10%	**31,500**
Console (Startup) + Customer Portal + Analytics	37,500	15%	**31,875**

A Startup lender may also apply to join the Interchange as a contributing member. That brings its book into the exchange and its exposure checks into every decision.

04 Going live

1. **Order form signed** and onboarding fee paid through the BirgenAI wallet or to M-PESA Buy Goods till 5620596.
2. **Organisation set up** on the platform: your company profile, logo and colours, branches, roles and your first administrator. You receive your own sign-in door at `lms.servicesuitecloud.com/<your-name>`.
3. **Products, charges and workflows** configured with you, M-PESA integration keys stored in your encrypted vault, and SMS sender set.
4. **Training** for administrators, loan officers and collections staff (half a day each), and the ConnectedSuite User Guide.
5. **First loan** disbursed from the console. Your first monthly invoice covers your first full calendar month.

05 Subscription terms

1. **Grant.** Techcrast grants the Subscriber a non-exclusive, non-transferable right to use the Lending Console (Startup edition), and any systems added by order, for its own lending business in Kenya, for as long as the subscription runs.
2. **Fees.** As on the order form and the Price Book. Invoiced monthly for the calendar month just closed, due on receipt, paid through the BirgenAI wallet. Fees exclude VAT where applicable.
3. **Non-payment.** Fourteen days after an invoice is due and unpaid, metered services pause until payment. Access to the loan book, repayments, collections and the Subscriber's data never stops for non-payment.
4. **Data.** The Subscriber owns its data and is its controller; Techcrast processes it as processor under the Kenya Data Protection Act 2019. Techcrast may use anonymised, aggregated statistics to operate and improve the platform. On exit the Subscriber receives a full export within 30 days.
5. **Ownership.** Techcrast, or its affiliate, owns the platform and every improvement to it. No equity or ownership interest is conferred.
6. **Liability.** Lending decisions are the Subscriber's own. Neither party is liable for indirect loss. Each party's liability is capped at the fees paid in the previous 12 months, except for fraud, data-

protection or confidentiality breaches, and unpaid fees.

7. **Term.** Month to month. Either party may end it with 30 days' written notice.
8. **Law and disputes.** Kenyan law. Disputes go first to the chief executives, then to arbitration in Nairobi under the Nairobi Centre for International Arbitration rules.
