ConnectedSuite

PRICING · EFFECTIVE 1 NOVEMBER 2026

ConnectedSuite Price Book and Subscription Guide

Seven systems for licensed lenders, priced one by one. You choose the systems you need, and the combination sets your monthly subscription. This guide shows every price, every discount, how the two invoices work, and worked examples of real packages.

Prepared for	Provider	Version	Currency
Lenders and prospective clients	**BirgenAI Hub Limited**	**2.0 · 27 Oct 2026**	**Kenya shillings (KES)**

For circulation to lenders. Prices exclude VAT where VAT applies. Prices on a signed order form or partner agreement take precedence over this guide. Replaces version 1.0 of 20 October 2026.

ConnectedSuite is developed and owned by BirgenAI Hub Limited, founded by Emmanuel Birgen, and distributed by Techcrast Software Solutions Limited.

01 How the subscription works

ConnectedSuite is one estate of systems that share one sign-in, one organisation structure and one record of every borrower. It is developed and owned by BirgenAI Hub, and packaged and sold under Techcrast's umbrella. Each system is a product you can take on its own or together with others. Your monthly bill is built in four steps, and every invoice shows all four:

STEP 1
Choose your systems. Each carries a monthly list price.

STEP 2
Multi-system discount. 10% for two, 15% for three, 20% for four or more.

STEP 3
Partner rate, if signed. A partner agreement sets the discount, not a fixed figure.

STEP 4
Usage past your allowance. Metered at the unit prices in section 4.

Each month is invoiced on its **first day**: the month's subscription in advance, plus the previous month's metered usage and Interchange reports. Invoices are due within 14 days. They are always in Billing, which is in the app launcher at the top right of every system, and in Billing in the Lending Console.

> **Two invoices, two companies**
>
> **BirgenAI Hub** invoices ConnectedSuite: your systems, usage and Interchange reports, paid into Till 5620596. **Techcrast** invoices only its own services, such as the ServiceSuite licence and support, paid into Paybill 303030. Each invoice is paid only to the account printed on it (section 7).

02 The systems and their prices

SYSTEM	WHAT IT DOES	KES / MONTH
Lending Console, Premium	Origination, scoring, approvals, disbursement, repayments and collections: the loan book, every day. Unlimited staff seats, portfolio early-warning and your own risk policy.	30,000
Lending Console, Startup edition	The same console for a young lender (eligibility in section 3), and the edition the Founding Partners are priced at. Up to 40 seats, with CRB and ID checks, the statement cruncher, Riri and the route planner.	20,000
CallBox Call-Center	The collections floor: dialler, work queues, promises to pay, call records and recoveries. Runs on your PBX or on ConnectBox. Up to 10 agent seats; larger floors are quoted.	15,000
PeopleHub HR	The whole HR estate for a lender. Staff records and the org chart. Geofenced attendance from the staff app, leave and rosters. Hiring from opening to onboarding, including applications by SMS. Scorecards fed from the Lending Console, incentives and commission. Contracts and letters signed on the phone, cases, exits and assets. Payroll preparation on Kenya's statutory rates, handed to Ledgerly, plus staff loans, training, benefits and privacy audit. Up to 500 staff; larger organisations are quoted.	25,000
Customer Portal	Your borrowers apply, track and repay on their phones, in your brand. Installable app.	10,000
Analytics & Reporting	Portfolio, branch, agent and collections reporting on the live book, plus scheduled reports.	7,500

Ledgerly Accounting	Your journal, chart of accounts and cash movement, read straight from the book.	7,500
The Interchange	Live exposure checks across member lenders, a consent register, CRB orchestration and bureau reports.	10,000
Interchange membership for a lender that **contributes its book** to the exchange		Waived

> **Every system includes**
>
> Hosting in Nairobi, daily backups, security updates, your own branded sign-in door and installable app, BirgenAI ID single sign-on across every system you hold, Riri support inside the console, and standard support (section 6). There is no charge per borrower and no charge per loan.

03 Editions, discounts and partner rates

The Startup edition

The Startup edition lets a newly licensed lender run on professional infrastructure from day one. It is the Lending Console at **KES 20,000 a month** instead of 30,000. A lender qualifies when all three of these hold:

- it is licensed or registered to lend in Kenya (CBK digital credit provider, microfinance bank, SACCO or equivalent), or has applied;
- it has been lending for less than 24 months, or holds fewer than 2,000 active loans; and
- it takes the Lending Console as its main system. Other systems can be added at list price, and the multi-system discount still applies.

A Startup lender moves to Premium at its first renewal after it passes either threshold. We give 60 days' written notice, and nothing is migrated: the change is a setting.

The multi-system discount

SYSTEMS CARRYING A PRICE	DISCOUNT ON THE LIST TOTAL
One	None
Two	10%
Three	15%
Four or more	20%

Partner rates

Partners build the estate with us. They contribute their book to the Interchange, give product feedback and take part in pilots. A partner's discount is set in its agreement. Its subscription is then the systems it has accepted at those prices, so it grows only when the partner accepts a new system after a pilot. The invoice lists each system at list price, then one *partner rate* line, so the partner can see what the rate is worth.

PARTNER	FOUNDING PAIR (LENDING CONSOLE + CALLBOX)	EACH SYSTEM ADDED LATER	INTERCHANGE MEMBERSHIP

Founding Partners (Axe Micro-Enterprise, Micromart Africa; TC-FPA-2026-02)	Console at the Startup edition, less KES 5,000 a month	List price less 20%	Waived while contributing
Ecosystem Partners (TC-EPA v2.0)	The multi-system discount, and a partner discount set in Schedule 2 of the agreement		Waived while contributing

04 Allowances and usage

Each Lending Console edition includes a monthly allowance of metered services. You pay only for use beyond it, at the unit prices below, on the next month's invoice. Unused allowance does not carry over.

METERED SERVICE	STARTUP INCLUDES	PREMIUM INCLUDES	BEYOND ALLOWANCE, KES
Credit scores	3,000	10,000	10 each
M-PESA statements crunched	1,500	5,000	5 each
Documents parsed	800	3,000	5 each
Identity verifications (pass-through)	400	1,500	40 each
Riri questions	2,000	10,000	3 each
SMS	2,000	5,000	Prepaid, below
Bureau (CRB) reports	No allowance: every pull costs the bureau		Rate Card, below

SMS bundles (prepaid)

Past the monthly SMS allowance, messages draw on prepaid credit, so they never appear on an invoice in arrears. Credits never expire. Signing codes and consent links always go out, even on a zero balance; reminders pause until a top-up lands.

BUNDLE	PRICE, KES	PER SMS
500 SMS	500	1.00
2,000 SMS	1,900	0.95
10,000 SMS	9,000	0.90

A lender sending through its own SMS provider, configured in the console vault, pays nothing here for messages.

Interchange reports

- **Ecosystem reports** are included for members who contribute their book: Ecosystem Exposure, Delinquency Status, and later Intent Signal, Contactability and Cohort Benchmark. A member that stops publishing its book loses them.
- **Bureau reports** are priced on the **Interchange API Rate Card**, per request the bureau answers. Each price includes the bureau's charge with its excise and VAT, a contract-holder fee, and the Interchange's fee for the consent check, the metering, the analysis and the report. For example: Identity Verification 45, Credit Info 170, Full Enhanced Credit Info 330, Credit File 790. A lender with its own bureau subscription pays the bureau directly and only the Interchange fee.

05 Worked examples

Every figure below is produced by the same code that issues the invoices.

A startup lender, console only

Lending Console, Startup edition	20,000
Monthly subscription	**KES 20,000**

A call-centre on its own

CallBox Call-Center	15,000
Monthly subscription	**KES 15,000**

An established lender: console and call-centre

Lending Console, Premium	30,000
CallBox Call-Center	15,000
Multi-system discount, 10%	−4,500
Monthly subscription	**KES 40,500**

A Founding Partner, November 2026

Lending Console, Startup edition	20,000
CallBox Call-Center	15,000
The Interchange, contributing member	Included
Founding Partner rate	−5,000
Monthly subscription	**KES 30,000**

With PeopleHub HR accepted: 20,000 + 15,000 + 25,000, less 10,000, is KES 50,000.

The whole estate

Lending Console, Premium	30,000
CallBox Call-Center	15,000
PeopleHub HR	25,000
Customer Portal	10,000
Analytics & Reporting	7,500
Ledgerly Accounting	7,500
The Interchange	10,000
Multi-system discount, 20%	−21,000
Monthly subscription	**KES 84,000**

For a lender that contributes its book, Interchange membership is waived: the list total is 95,000, and after the 20% discount the estate is KES 76,000 a month.

06 Onboarding, support and service levels

ITEM	STANDARD	STARTUP	PARTNER

Onboarding: set-up, data migration, training (one-time)	KES 50,000	KES 25,000	Waived
Connecting an existing ServiceSuite book (bridged mode)	Included in onboarding		
PeopleHub HR import and go-live (staff, balances, history)	Included in onboarding		
Support hours	Monday–Saturday, 08:00–18:00 EAT, through Riri in the console, email and phone		
Severity 1 (system down) response	2 hours	4 hours	1 hour
Monthly availability target	99.5%, measured at the sign-in door		
Your own branded app and door	Included		

07 Paying

CONNECTEDSUITE INVOICE

From BirgenAI Hub

Open **Billing** in the app launcher (top right, in any system) or in the Lending Console, and press **Pay with M-PESA**. The prompt comes to the phone you enter, and the invoice is marked paid as soon as M-PESA confirms.

Or pay **M-PESA Buy Goods Till 5620596**, account name **BIRGENAI HUB**, then press **I paid** and enter the M-PESA code.

TECHCRAST INVOICE, IF YOU HOLD TECHCRAST SERVICES

From Techcrast

Pay **M-PESA Paybill 303030**, account number **2044699985**, account name **Techcrast Software Solutions Ltd**. Then press **I paid** next to the invoice in Billing and enter the M-PESA code.

This invoice covers Techcrast's own services, such as ServiceSuite, at prices Techcrast sets. It is not a ConnectedSuite fee.

Pay each invoice only to the account printed on it. An invoice unpaid 14 days after issue moves the subscription to *past due*, and metered services (scoring, bureau, identity, Riri) pause until payment. **The loan book, repayments and collections never stop**, and nothing is deleted for non-payment.

08 Terms in brief

- **Term.** Month to month, unless a partner agreement or order form sets a term. Either side may end it with 30 days' written notice.
- **Adding a system.** Piloted first at no charge, then billed from the month after you accept it. Removing a system takes effect from the next month.
- **Price changes.** Only on 60 days' written notice. Past invoices never change: each is frozen with the prices as charged.
- **Your data.** Your book, your staff and your borrowers' data remain yours. BirgenAI Hub processes them on your instructions, under the Data Protection Act, 2019. On exit you receive a full export.
