THE INTERCHANGE · CONNECTEDSUITE CREDIT EXCHANGE

API RATE CARD

Effective 1 November 2026 · Version 1.0 · Kenya shillings (KES)

Content: Reports requested by a member's system on the Interchange API, from the Interchange console, or through the Lending Console's credit check.

API REQUEST	REPORT TYPE	DESCRIPTION	PRICE PER REQUEST (KES)
ECOSYSTEM REPORTS · POST /API/V1/REPORT · ANSWERED FROM MEMBERS' LIVE BOOKS			
Ecosystem Exposure	20	Is this applicant servicing loans at other members right now: how many, at how many lenders, the banded total, the worst arrears bucket and the latest disbursement. Under a second.	Included*
Delinquency Status	2	In arrears anywhere in the ecosystem today, live from member books, not a monthly submission.	Included*
Intent Signal · Contactability · Cohort Benchmark	21 · 22 · 23	Recent applications across members; how a borrower is reached; how they compare with peers. From release.	Included*
DECISION REPORTS · POST /API/V1/REPORT · THE BUREAU'S DATA, READ AS A DECISION, JSON AND PDF IN ONE CALL			
Identity Verification	1	Verify an identity number of a given ID type, with the details on file.	45
Credit Info	8	Every account on file and how it performs, the headline score, sector split and enquiries, with the Interchange's totals, concentration, staleness and risk accounts.	170
Credit File	12	The full file: identity, scrub, all credit information, the 12-month score and PPI trend and an income estimate (bureau reports 12, 8 and 11), as one decision report.	790
BUREAU DIRECT · POST /API/V1/BUREAU · THE BUREAU'S OWN REPORT NUMBERS, RESPONSE RETURNED EXACTLY AS SENT			
Identity Verification	1	Verify an identity number of a given ID type.	45
Delinquency Report	2	Check whether an identity has a current or historical non-performing account.	45
Credit Score	3	Fetch the credit score of a given identity.	85
JSON Credit Report	5	Fetch the full credit report for a given identity.	135
Identity Scrub	6	Non-account information available for a given identity.	45
Credit Info	8	All credit information for a given identity.	170
Enhanced Credit Info	10	All credit information, with guarantor and stakeholder details.	250
Credit Info with Income Estimation	11	All credit information, plus an income estimate.	290
Full Enhanced Credit Info	12	All credit information, identity verification and scrub, 12 months of score and PPI.	330
Minified Credit Info	13	A minified summary of credit information for a given identity number.	170
Full JSON Credit Report	14	The full report in JSON: identity, scrub, credit, stakeholder and guarantor information.	330

All prices are per request answered and include the bureau's own charges, 10% excise duty and 16% VAT. *Included for members who contribute their book to the Interchange. VAT on the Interchange's own service is added only where the issuer is registered for VAT.

01 How a bureau request is fulfilled

LANE	HOW IT WORKS	YOU PAY
Shared bureau lane for a member without its own bureau subscription	The Interchange fulfils the request under a contract-holding member's bureau subscription, with the applicant's consent and under the Founding Partnership Agreement TC-FPA-2026-02. The contract holder is reimbursed the bureau's charge and receives a contract-holder fee. You never deal with the bureau yourself.	The price on page 1
Own-contract lane for a member with its own bureau subscription	Your own subscription is connected through the Interchange at no set-up charge. The bureau bills you directly, and the Interchange charges only its own fee for the consent check, the metering, the analysis and the report.	The bureau's charge, to the bureau, plus the Interchange fee below

REPORT TYPE	1	2	3	5	6	8	10	11	12	13	14	CREDIT FILE
Interchange fee, own-contract lane, KES per request	11	11	16	25	11	32	44	49	55	32	55	136

What every request includes

- A consent check before anything is asked: no consent, no pull, no charge.
- The price shown in the console before you confirm a pull.
- The bureau's response exactly as the bureau sent it.
- The Interchange's own analysis beside it, clearly labelled.
- JSON and PDF in one call (format "bundle"), billed once.
- A full audit trail: who asked, when, under which consent, and the bureau's transaction reference.
- A report already pulled can be reopened from the store at no new charge.

Billing and payment

- Requests are metered as they happen and billed monthly in arrears, on the ConnectedSuite invoice BirgenAI Hub issues on the 1st of each month.
- Each invoice comes with the usage statement: every request, its time, report, channel and user.
- A request is charged only when the bureau answers it. A request refused at the consent gate, or one that fails before the bureau answers, costs nothing.
- Pay by M-PESA from **Billing** in the app launcher, or to **Buy Goods Till 5620596**, account name **BIRGENAI HUB**.

Service and conditions

Availability. 99.5% a month target. Ecosystem reports answer in under a second, and bureau requests in 0.3 to 3 seconds, depending on the bureau.

Ecosystem reports are included for members who publish their book to the Interchange at least daily. A member that stops publishing loses them until it resumes.

Limits. A daily request limit and a monthly ceiling may apply in the shared bureau lane, as agreed with the contract holder.

Volume. Above 5,000 bureau requests a month, prices are by agreement.

Changes take effect on 30 days' written notice. A change in the bureau's own prices, or in the taxes on them, passes through at once, and by no more than that change.

Report 4, the bureau's own PDF, is not offered through the Interchange. The Interchange's PDF comes with every decision report.

Bureau data is supplied by Metropol Credit Reference Bureau Limited under a member's subscription.
