ConnectedSuite

BUILT TO AXE MICRO-ENTERPRISE'S OCTOBER 2026 MOCKUP · TC-FPA-2026-02, CLAUSE 6.6

PeopleHub HR Build Blueprint

How every module in the PeopleHub mockup will be built end to end, with nothing left out and each part made better: the architecture, the order it ships in, how each module is tested, and how Axe accepts it before PeopleHub joins its invoice.

Prepared for	Built by	Pilot	Specification
Axe Micro-Enterprise Ltd	**BirgenAI Hub · Emmanuel Birgen**	**16–30 November 2026**	**PeopleHub_HR_mockup.html**

Shared with Axe Micro-Enterprise Ltd under TC-FPA-2026-02. The mockup is the specification; this blueprint is how it is delivered.

ConnectedSuite is developed and owned by BirgenAI Hub Limited, founded by Emmanuel Birgen, and distributed by Techcrast Software Solutions Limited.

01 The promise

THE SPECIFICATION

The mockup, to the letter

Every screen, field, action and rule in Axe's PeopleHub mockup is built. Appendix A lists all 81 sections of the mockup's code and where each one is delivered, so Axe can tick them off.

THE STANDARD

Everything better

Live numbers where the mockup shows samples, real security where it shows buttons, and Kenya's law built in: the Employment Act, KRA, NSSF, SHIF, the Housing Levy and the Data Protection Act.

THE COMMERCIAL

Paid only when accepted

PeopleHub joins Axe's invoice (KES 20,000 at the Founding Partner price) from the month after Axe accepts the whole of it. The pilot costs nothing.

02 What PeopleHub is

GROUP	SCREENS IN THE MOCKUP
Home	People dashboard · Reports · Leaderboards · Birthdays and work anniversaries
People	Staff directory · Employee profile · Org chart (Managing Director to every branch) · Job groups · Personal contact details
Time	Attendance (live from the app, geofenced) · Leave (cover, balances, the cost of unused leave) · Rosters (two people inside a branch on working days) · Overtime, holiday pay and the minimum-wage check
Hiring	Headcount plan · Openings (MD approval unless funded) · Pipeline · Talent pool · Referrals · Apply by SMS and USSD · Screening, tests and field trial · Assessment day · Fraud and background checks · Offers · Pre-boarding · Onboarding · Hiring reports
Performance	Scorecards (Lending Console figures with PeopleHub time and visits) · Role scorecards · Goals & OKRs for every department · Reviews, 1:1s and review cycles · Improvement plans · Incentives and commission by product · Growth and succession · Recognition, pulse and flight risk · Training
Records	Employee files · Contracts & letters signed on the phone · Cases & discipline · Grievances · Exits & offboarding (resignation, dismissal, redundancy under s.40, retirement, medical retirement, death in service) · Work injuries & incidents · Asset register · Policies & announcements · Privacy & audit
Payroll	Payroll preparation and run · Pay elements · Statutory rates, versioned · Switches and PAYE exemptions per run · Pay-detail changes with a second approver · Payslips and P9 · Loans & advances · Field expenses · Benefits
Configuration	Geofences & app policy · Settings · Roles & access with "View as" · Operations roles · Approvals inbox with delegation · Notifications · Import & go-live
Mobile	The PeopleHub app (version 3.0): what a relationship officer in Kapenguria sees, offline-first and light on data · My PeopleHub, desktop self-service

Eight roles see and do what the mockup's access matrix says: Relationship Officer, Customer Service, Branch Manager, Regional Manager, HR, Finance, Internal Audit and Managing Director. **Five connections:** the Lending Console (officer KPIs, visits, branch targets), Ledgerly (payroll journal, statutory payments, fixed assets), BirgenAI ID (one login, created on hire and closed on exit), Bulk SMS (sender ID AXE-JOBS) and CallBox (a complaint about a staff member opens a case).

03 How it is built

Where it lives

Inside ConnectedSuite, as the PeopleHub system Axe already opens at **peoplehub.servicesuitecloud.com/axe**, beside the Lending Console and CallBox. It runs on the same servers in Nairobi and the same database, and each organisation's data is kept apart. Today's directory (officers, branches, the call floor) becomes the foundation; nothing Axe uses now is lost.

One identity

Every member of staff is a BirgenAI ID. Hiring someone creates their login with the role their job group implies. An exit closes it in every system within the same hour, before the client book can walk out with anyone.

Access, enforced on the server

The mockup's role matrix (none, self, team, view, manage, all, per module) is enforced on every request, not just hidden on screen. "View as" lets HR check what a role sees, and every look at a sensitive file is logged.

The staff app

An installable app, offline-first: clock-ins, leave, claims and requests queue without signal and sync later. Geofenced attendance uses GPS accuracy checks, mock-location detection and a selfie with liveness. In English and Kiswahili, and light on data.

Money needs two people

Publishing a payroll, changing someone's pay details, approving a loan: each needs a maker and a checker with a one-time PIN, and every change is kept in history. A new bank or M-PESA detail is held for its first payment.

The law, as data

PAYE bands and reliefs, NSSF tiers, SHIF and the Housing Levy are dated versions. A payroll uses the version in force on the first day of its period, and a new version needs two approvers. Leave and exits follow the Employment Act, and records follow the Data Protection Act.

Core data

AREA	RECORDS
People	Employee (linked to the BirgenAI ID), Employment (contract, job group, branch, manager, probation, end), Job group (grade, pay band, KPIs), Region, Branch, Department, Emergency contacts
Time	Geofence, Attendance event (method, position, accuracy, selfie check, offline flag), Shift and roster, Leave policy, Leave balance, Leave request and cover, Overtime, Public holiday
Hiring	Headcount plan, Opening, Candidate, Application, Screening answer, Test, Interview, Check (good conduct, CRB, IPRS), Offer, Referral, Pre-boarding task
Performance	Scorecard template, KPI and its source, Signal, Dispute, Objective, Key result, Check-in, Review cycle, Review form, Rating, Improvement plan, Incentive scheme, Payout, Course, Certificate, Kudos, Pulse
Records	Document, Template, Signature (with one-time PIN), Case, Hearing, Appeal, Grievance, Exit, Clearance, Asset, Incident, Policy, Acknowledgement, Access log, Data-subject request
Payroll	Pay run, Pay element, Deduction, Statutory rate version, Payslip, P9, Staff loan, Advance, Repayment, Expense claim, Benefit, Dependant, Beneficiary

04 Every module, end to end

For each group: what the mockup shows, how it is built, and what is better than the mockup. The mockup's own screen titles are kept, so Axe's staff meet the screens they reviewed.

MODULE	BUILT AS IN THE MOCKUP	BETTER THAN THE MOCKUP
Dashboard	Headcount, attendance today, leave, openings, alerts, by region and branch.	Live from the records and the Lending Console. Each tile opens the list behind it.
Directory, profile, org chart	Every member of staff with role, branch, manager, contacts, documents, history. Reporting lines from the MD to every branch. Transfers and letters from the profile.	Officers already in Axe's books (Boresha and Stawi) are matched to their HR record, so a loan officer's file shows the loans they hold.
Attendance	Clock-in from the app inside the branch geofence, selfie, field check-in, lock, excuse and decision flows.	Works offline. Spoofed locations are flagged. Lateness and absence feed payroll and scorecards automatically.
Leave and rosters	Requests, cover, balances, carry-over cap, expiry, advance leave, the cost of unused leave, rosters with the two-inside rule.	Balances accrue by policy, pro-rated for joiners. A roster that breaks the two-inside rule cannot be published.
Overtime and minimum wage	Extra hours, rest days, public holidays, paid or taken as time off.	Every salary is checked against the gazetted minimum wage for the branch's area before payroll runs.
Hiring	Headcount plan, openings with MD approval, pipeline board, screening, tests, field trial, assessment day, checks, offers, talent pool, referrals, hiring reports, onboarding.	Candidates apply by SMS or USSD on any phone. Checks run through the estate's own IPRS and CRB rails with consent. An accepted offer becomes an employee and a BirgenAI ID in one step.
Performance	Officer scorecards with fairness adjustments, signals and disputes, role scorecards, OKRs cascaded to every department, reviews, 1:1s, calibration, improvement plans, growth and succession, recognition and pulse.	Loan figures come from the Lending Console, the same numbers the book shows, so no officer is scored on a spreadsheet. A dispute is a record with an answer and a date.
Incentives and commission	Rates by product, thresholds, tiers, bonuses, clawbacks, paid with salary.	Computed from collected money, not disbursed money, with clawback when a loan defaults. The payout lands on the payslip automatically.
Training	Mandatory courses, learning paths, sessions, certificates, in English or Kiswahili, in the app.	Expiring certificates appear on the dashboard before they lapse.
Contracts and letters	Fixed-term contracts, probation ends, renewals, amendments, letters from templates, signed on the phone with a one-time PIN.	Each signature is bound to the document's hash and the signer's verified phone, and the PDF carries the evidence.
Cases, grievances, discipline	A fair process step by step: the employee is heard before any decision, nobody decides a case they investigated, appeals.	The process is enforced: a decision cannot be recorded before the hearing, or by the investigator.

Exits and offboarding	From notice to certificate of service, clearance, exit interviews, redundancy under s.40, retirement, medical retirement, death in service.	Access closes in every system on exit day. Assets and loans are cleared against final dues, and the client book is reassigned.
Payroll	Pay elements with tax treatment, statutory rates by version, switches and PAYE exemptions per run, approvals, payslips, P9, the journal to Ledgerly.	A parallel run against Axe's current payroll before the first live month. Payslips arrive in the app. Statutory returns are produced as upload files.
Loans, advances, expenses, benefits	Staff salary advances and loans requested in the app, repaid through payroll, kept apart from the client book. Fuel, mileage and repairs claimed with a receipt photo. Medical cover, group life, accident and last expense, pension.	A mileage claim is checked against the distance the app recorded. A loan's deduction can never take pay below the legal floor.
Assets, incidents, policies	Phones, motorbikes and computers: who holds what and its value. Injuries reported at the scene, with DOSHS deadlines. Policies with read-and-accept, and announcements by app and SMS.	The asset register stays in step with Ledgerly's fixed assets, and exits clear assets automatically.
Privacy and audit	Who saw what, what is kept and for how long, data-subject requests.	Retention runs on schedule. A data-subject request has an owner and a deadline. An audit pack exports in one click.
Configuration	Geofences and app policy, settings, roles and access with View as, operations roles, the approvals inbox with delegation, notifications, import and go-live.	Import checks every balance against the old system and refuses to go live until they match.
The app and self-service	Everything Grace does on her phone shows in the web app: clock-in, leave, payslips, P9, loans, claims, training, kudos, pulse, policies, incidents.	One app for every system Axe staff hold, signed in with BirgenAI ID. Usable on a low-end Android phone and a weak signal.

05 The build plan

RELEASE	DATES	WHAT SHIPS
R1 · Core and time	28 Oct – 8 Nov	Platform, roles and access, import and go-live, dashboard, directory, profiles, org chart, job groups, contacts, geofences, attendance with the app, leave, rosters, notifications, policies, approvals inbox, My PeopleHub, the app shell.
R2 · Records and payroll	9 – 15 Nov	Employee files, contracts and letters with e-signature, cases and grievances, exits of every type, privacy and audit, payroll run with statutory rates and pay elements, payslips and P9, loans and advances, field expenses, benefits, assets, incidents, overtime and minimum wage.
R3 · Hiring and performance	16 – 29 Nov	The whole hiring suite (planning to onboarding, SMS and USSD applications, checks, assessment day, reports), scorecards, OKRs, reviews and cycles, improvement plans, incentives and commission, leaderboards, growth and succession, recognition and pulse, training, reports, birthdays and anniversaries.

Pilot	16 – 30 Nov	R1 and R2 live with Axe's HR and a pilot region. The November payroll is run in parallel with Axe's current payroll, and nothing is paid from PeopleHub until the two match to the shilling. R3 joins the pilot as each part is ready.
Acceptance	by 4 Dec	Axe tests each module against the mockup and Appendix A, and signs the acceptance certificate (TC-FPA-2026-02, Schedule 6). PeopleHub is billed from the month after.

> **Said plainly**
> R3 is the largest release and runs during the pilot. If any part of it is not ready by 29 November, it pilots into December, and PeopleHub's billing waits for it. Axe never pays for a module it has not accepted.

06 How each module is proved

- **Screen by screen against the mockup.** Each item in Appendix A has a walkthrough test: the same screen, fields and actions, on Axe's own data.
- **Payroll, to the shilling.** A parallel November run against Axe's current payroll. PAYE, NSSF, SHIF and the Housing Levy are checked against the published tables, and P9 totals against the run.
- **Access.** Every role is tested with View as, and with direct requests to the server, against the access matrix in the mockup.
- **In the field.** The app is tested on low-end Android phones at a branch with a weak signal, offline and back.
- **Import.** Staff, leave balances, loans and history are reconciled with the old system before go-live.
- **Speed.** Dashboards open in under 2 seconds and the app in under 3 seconds on 3G.

07 What Axe provides

ITEM	FOR	BY
An HR lead for the pilot, and a finance contact for payroll	Decisions within 2 business days	28 Oct
The staff list, contracts, job groups and pay data from the current system	Import (R1)	1 Nov
Leave, overtime, allowances, loan and expense policies	Time and payroll rules	3 Nov
Branch locations for the geofences	Attendance	3 Nov
October payroll, as paid, and the November inputs	The parallel run	10 Nov
Ledgerly chart-of-accounts mapping for payroll and assets	The journal	10 Nov
The pilot region and its staff	The pilot	14 Nov

08 Commercials

PeopleHub HR lists at **KES 25,000 a month** for up to 500 staff, and joins Axe's invoice at the Founding Partner price of **KES 20,000**. That takes Axe's monthly subscription from KES 30,000 to KES 50,000, from

the month after acceptance. Import, go-live and training are included. Micromart may pilot PeopleHub on the same terms.

A Appendix A: Every section of the mockup, and where it ships

The 81 sections of PeopleHub_HR_mockup.html, in the mockup's own order and words. Each one is delivered in the release shown, and Axe ticks it at acceptance.

#	MOCKUP SECTION	MODULE	RELEASE	ACCEPTED
1	PeopleHub app shell	Platform	R1	
2	Generic building blocks	Platform	R1	
3	Sample data (replaced by Axe's live records)	Import & go-live	R1	
4	Core: helpers, state, router, shell	Platform	R1	
5	Dashboard	Home	R1	
6	Staff directory	People	R1	
7	Employee profile	People	R1	
8	Org chart	People	R1	
9	Attendance	Time	R1	
10	Leave	Time	R1	
11	Rosters	Time	R1	
12	Hiring: data model (screening, automations, checks, offers)	Hiring	R3	
13	Openings	Hiring	R3	
14	Pipeline	Hiring	R3	
15	Onboarding	Hiring	R3	
16	Scorecards	Performance	R3	
17	Goals & OKRs	Performance	R3	
18	Reviews & 1:1s	Performance	R3	
19	Contracts & letters	Records	R2	
20	Cases & discipline	Records	R2	
21	Payroll prep	Payroll	R2	
22	Geofences & app policy	Configuration	R1	
23	Settings	Configuration	R1	
24	Talent pool	Hiring	R3	
25	Referrals	Hiring	R3	
26	Hiring reports	Hiring	R3	
27	Candidate data settings	Hiring	R3	
28	Hiring, part 3: planning, volume hiring, fraud checks, pre-boarding, quality	Hiring	R3	
29	Extra checks on every candidate	Hiring	R3	
30	Tests and field trial	Hiring	R3	
31	Assessment day (volume hiring)	Hiring	R3	

32	Card and drawer extras	Hiring	R3
33	Replacement openings and headcount plan	Hiring	R3
34	Quality of hire, calibration and hiring cost	Hiring	R3
35	Apply by SMS (same flow on USSD)	Hiring	R3
36	Performance, part 2: fair scoring, roles, incentives, PIPs, reviews, growth, engagement	Performance	R3
37	Officer scorecard, rebuilt with fairness, signals and disputes	Performance	R3
38	Role scorecards	Performance	R3
39	Incentives and commission	Performance	R3
40	Performance improvement plans	Performance	R3
41	Review forms and calibration spread	Performance	R3
42	Growth and succession	Performance	R3
43	Recognition, pulse surveys and flight risk	Performance	R3
44	Records revamp: shared	Records	R2
45	Contracts & letters (revamp)	Records	R2
46	Cases & discipline (revamp)	Records	R2
47	Exits & offboarding	Records	R2
48	Payroll run (revamp)	Payroll	R2
49	Privacy & audit	Records	R2
50	Records overview	Records	R2
51	Loans & advances (PeopleHub owns them; the Lending Console stays client-only)	Payroll	R2
52	Job groups (shared)	People	R1
53	Review cycles	Performance	R3
54	Job groups page	People	R1
55	Roles & access, and View as	Configuration	R1
56	Statutory rates, versioned	Payroll	R2
57	Commission by product	Performance	R3
58	Operations roles	Configuration	R1
59	Personal contact details	People	R1
60	Statutory switches per run, and PAYE exemptions	Payroll	R2
61	Notifications	Configuration	R1
62	My PeopleHub (desktop self-service)	Self-service	R1
63	Leaderboards	Performance	R3
64	Pay elements: allowances, benefits and deductions with tax treatment	Payroll	R2
65	Reports	Home	R3
66	Pay-detail changes: second approver, one-time PIN, first-payment hold, history	Payroll	R2

67	Approvals inbox with delegation	Configuration	R1
68	More exit types: redundancy (s.40), retirement, medical retirement, death in service	Records	R2
69	Import & go-live	Configuration	R1
70	Training	Performance	R3
71	OKRs for every department	Performance	R3
72	Overtime, holiday pay and the minimum-wage check	Time and payroll	R2
73	Policies & announcements	Configuration	R1
74	Birthdays and work anniversaries	Home	R3
75	Company asset register	Records	R2
76	PeopleHub mobile app	The app	R1
77	Field expenses: fuel, mileage and repairs	Payroll	R2
78	Work injuries and incidents	Records	R2
79	PeopleHub app 3.0: the revamped phone experience	The app	R1, completed in R3
80	Benefits: medical, group life, accident, last expense, pension	Payroll	R2
81	Boot	Platform	R1
