SOURCE · THIS CONSOLE, COMPUTED LIVE FROM THE LENDER'S OWN SCHEDULE

04 NOT OBTAINED

What could be known about this customer and is not, priced by what each would add.

- ☐ **Identity verification** worth +20
Nothing else in this file means anything if this is the wrong person — and no money may be disbursed until it is done.
- ☐ **M-Pesa affordability report** worth +15
What they can actually service, from their own cashflow rather than their own account of it.
- ☐ **Credit bureau report** worth +15
What they owe other lenders, as filed. A billed pull — the cost is why this is a decision, not a default.
- ☐ **Government registry match** worth +10
IPRS is the one check a fraudster cannot supply. Without it, a good selfie score is all that stands behind this identity.
- ☐ **Interchange exposure — CRB 2.0** worth +10
What the other lenders would answer right now, rather than what they filed a month ago. Nothing is pooled and no book is exposed.
- ☐ **Consent on file** worth +2
The lawful basis for holding everything above it. Without it, the file is evidence of a problem rather than of a customer.

05 EXHIBITS — 4 ITEMS

Photographed by an officer standing in front of it, held in the lender's own system.
